Why offer automated insurances to your clients and members?

01 Additional revenue benefits

When you become an introducer / affiliate partner with us you can earn significant extra income by offering your clients / members access to a world leading online Multi-quote & buy insurance platform, at no cost to yourselves. Our established partnership scheme gives you an easy opportunity to take advantage of up to 50% of the commission earned, once a policy has been sold through your introduction.

You can also enhance the services and benefits provided to your clients / members and instead of receiving the money yourselves, we can also offer a flexible alternative; allowing you to use your introductory fees to discount your clients / members' premiums.

Whichever option you choose, or indeed both, you will be doing so without compromising any integrity as we are highly experienced in the field, offering more online Professional Indemnity and Directors & Officers choices than any other Broker in the UK, all available 24 / 7, 365 days a year!

02 How does it all work?

Our free online Multi-quote & buy insurance platform can easily be set up on your website with a white-labelled link to match your branding, allowing your clients / members to purchase SME commercial insurances, 24 / 7.

Don't worry, as an FCA authorised Insurance Broker we handle all of the insurance enquiries, claims, payment collections and policy issuing etc; facilitated by an experienced broking team, giving you peace of mind that your clients / members are in safe hands.

03 It couldn't be easier

To get started, simply send us your high definition logo and website address and we will be able to create your unique MOCK system for you to test. Whilst the system has been built with ease of use in mind, we will happily provide on hand training to help guide you through the platform.

Once you have approved the MOCK and signed our terms of business, we have the ability to set the system live on your website within hours, setting you free to expand your services and benefits to your client / member base.

Every month you will receive a statement of sales that have been generated from your introductions to us, together with direct payment via electronic transfer of the applicable referral fees (if this option is chosen). As mentioned above, if you prefer to discount your clients / members' premiums, this will be actioned at point of sale.

04 So, why choose us?

With over 30 years' experience in servicing the SME insurance sector and over 10 years' experience in the world of online insurance trading, we consider ourselves as a leader in the field.

We offer a unique market offering to organisations who are keen to broaden the services provided to their clients / members, by giving them access to a free online Multi-quote & buy insurance platform which includes a very impressive SME product range, supplied by a host of A-rated Insurance Providers and can be set up within hours, rather than months.

In addition, if you have a large group of clients / members, we can build you a bespoke online system for them to purchase the required covers, 24 / 7.

05 Products we have built online

We have built insurance platforms in many countries around the world for introducers & affiliates, helping them add real value to their client / member base:

06 Flexible, first class system

We can adapt the platform for almost any insurance requirement and its ability to offer 24 / 7 trading, in any language and currency, is second to none.

Once you have signed our terms of business agreement and approved the MOCK system, incorporating your live link can be done in the following ways:

- Simply notify whoever manages / hosts your website and provide us with their details. We will then make contact directly to show them how to add the system to your website.
- Alternatively, forward your website login details – these will usually be in the form of an 'FTP' address (e.g. ftp.yourwebsite.com), a username and a password. If in doubt, the company or person who built, hosts or manages your website should be able to supply these.
